

## College Awards Night held

Outstanding faculty, staff and students were recognized for leadership and academic excellence at Gallaudet's Awards Night held at the Elstad Auditorium on May 10. A reception followed in the Ely Center Atrium.

The highlight of the Awards program was the dedication of the 1983 *Tower Clock* yearbook to President Edward C. Merrill, Jr. Merrill made six trips to the stage—twice to present an award and four times to receive an award. In addition to the yearbook dedication, Merrill received the Man of the Year Award from the Chi Omega Psi Sorority. That sorority also presented Frances Merrill with a farewell gift, which Merrill accepted on her behalf. The Student Body Government gave Merrill a Special Appreciation Award.

The Alpha Sigma Pi Fraternity presented its Man of the Year Award to Allen Sussman, dean of Student Affairs. The fraternity's Mother of the Year Award went to Carolyn Jones, associate professor in the Library, and the Teacher of the Year Award was presented to Kathryn (Kitty) Baldrige of the Department of Physical Education and Athletics.

Robert Davila, vice president for Pre-College Programs, was honored with the Man of Merit Award by the Delta Epsilon Sorority.

The Chi Omega Psi Sorority presented its Woman of the Year Award to Sue Raley-Lyon, assistant dean for Auxiliary Programs.

The Phi Kappa Zeta Sorority presented its Woman of the Year Award

to Carole Schauer, director of Otis House, a halfway home for deaf people in D.C.

The Student Body Government's Faculty-Staff Member of the Year Award went to Marty Willigan of Maintenance and Operations.

The Kappa Gamma Fraternity's Alumnus of the Year Award was presented to Thomas Berg, facilities coordinator of the Field House.

The African Student Union Faculty-Staff Member of the Year Award went to Joe Kinner, assistant professor with the History Department.

Dennis Simpson of Alpha Sigma Pi presents the Mother of the Year Award to Carolyn Jones.

President Merrill receives a plaque from Lori Maynard, left and Minnie Mae Wilding as part of the Tower Clock dedication at Awards Night.

## Crammatte studies deaf professionals

Alan B. Crammatte's two semesters at Gallaudet as the Powrie V. Doctor Chair of Deaf Studies recipient is drawing to a close, but that doesn't mean he'll be stopping work.

Crammatte, who has been compiling information about hearing impaired people in professional positions throughout the United States, plans to continue working with the project until all the results are finalized, he hopes by next December.

When the study is finished and the computerized analysis of data is completed, Crammatte hopes that people will have a good idea not only of how the number of deaf people in professional jobs has increased since he did his original study back in the 1960s,

but also of the various factors which have influenced their success.

Crammatte is looking at professional hearing impaired people who work with other hearing impaired people, as well as those who work in the hearing world. During the past two semesters, the names of professional hearing impaired people employed full-time were collected (using the Bureau of the Census classification of "professional, technical and kindred, and managerial" jobs). Questionnaires were sent to 3,193 people, and as of May 6, 1,737 people had responded. A second mailing was sent out recently. By the end of May, Crammatte hopes to begin a complete computerized analysis of the data collected.

Crammatte's study will compare hearing impaired people who work in the deaf sector with those who work in the hearing sector. One part of the analysis will include how persons with severe hearing loss compare in level of employment with those who have better hearing. Another part will categorize persons of similar ages, to try to relate their accomplishments to various developments during the past 20 years.

He will also compare demographic information about severely and profoundly deaf persons working in the hearing sector today with the group that he studied during the 1960s. (Information from this previous study resulted in the book *Deaf People in Professional Employment*.) All of the information will be cross-tabulated in relation to the level of communication that hearing impaired professionals have with their coworkers.

A regression analysis of the information

## Collegiate Faculty finish another year

by Nancy Connors

The past two years have been a time of change for faculty members at Gallaudet College. Following the reorganization of the College the graduate faculty and the undergraduate faculty voted to form a combined Collegiate Faculty in May, 1981. Since then the organization has adopted new bylaws for the organization and guidelines for the governance of the faculty, established a Graduate Council and planned extensively for the new School of Preparatory Studies, which will begin on the Northwest Campus this fall.

During this time, Richard Meisegeier, professor in the Sociology and Social Work department, has served as chair. On April 18, the chairs of the standing committees of the Collegiate Faculty presented Meisegeier with an award in recognition of meritorious service to the faculty. Meisegeier served for two years as the first faculty member to preside as chair of the combined Collegiate Faculty.

Prior to May, 1981 the undergraduate faculty met under the chairmanship of the vice president of Academic Affairs and the graduate faculty met under the assistant vice president for Academic Affairs. The faculty voted merger was in keeping with the reorganization of the College and the creation of three schools. All persons holding full-time faculty appointments in the departments of instruction in the College of Arts and Sciences, the School of Education and Human Services, and the School of Communication are members of the Collegiate Faculty. In addition the College president, the vice president for Academic Affairs, the Graduate dean, and the deans of the three schools are voting members of the faculty. Approximately 235 people make up this organization.

The Collegiate Faculty has an extensive committee system for carrying out its three major duties. In relation to the students of the College, the Collegiate Faculty prescribes requirements for

Alan Crammatte works in his office in the trailer behind House 3.

## Trybus receives Kellogg grant

Ray Trybus, dean of the Research Institute, has received a \$35,000 three-year grant from the W.K. Kellogg Foundation's National Fellowship Program.

Trybus is one of 47 American professionals given the grant this year. The Fellowship Program, begun in 1980, is aimed at helping the nation expand its pool of capable leaders. The program is structured to increase individuals' skills and insights into areas outside their chosen disciplines so they can

deal more creatively and effectively with society's complex problems.

The foundation's Fellowship Program focuses on leadership in three areas: agriculture, health and education. Fellowship recipients devote 25% of their time each year to a series of leadership development activities including seminars that focus on issues facing leaders in domestic and international settings, travel experiences and consultations.

Trybus said that he plans to use the program to broaden his expertise from the study of deafness to disabilities in general and to human resource development in general. "One part of human resource development is education and higher education. I'd like to focus on higher education management," he explained. He said he also would like to study French, Spanish and Russian languages. "I'm very excited and honored to have received this grant," he said. The Fellowship program, Trybus added, would enable him to "provide more effective leadership in developing the scope and status of deafness research and integrating it more effectively with related research programs in other fields and other nations."

The Kellogg Foundation has made grants totaling more than \$643 million since its beginning in 1930.

Ray Trybus

## Sponsored R&D

### Grant/contract deadlines

Provided below are application deadlines of selected federal programs that offer potential grant or contract opportunities for Kendall Green faculty, staff and graduate students. More details on programs of interest can be obtained from the Office of Sponsored Research, x5030 (voice or TDD).

Deadline	Program
06/01/83	NINCDS: Speech, Language Disorder Research Training
06/01/83	ADAMHA: National Research Service Awards
06/01/83	NEH: Higher Education Humanities Consultant Grants
06/01/83	NIMH: Mental Health Research Program
06/01/83	HHS: Community Service Discretionary Grants
06/01/83	NEH: National Endowments Challenge Grants
06/03/83	ED: Business and International Education Program
06/09/83	NIMH: Diagnostic Interview for Psychiatry
06/10/83	ED: State/Local Communication Network for Exploring Critical Issues Related to P.L. 94-142
06/10/83	NIH: Factors Predictive of Reading and Writing Skills in the Congenitally Deaf
06/15/83	NEH: Elementary and Secondary Humanities Education Grants
06/30/83	NIHR: Rehabilitation Research and Training Centers
07/01/83	NIHR: Fellowships in Handicapped Research
No Specific Deadline	NSF: Behavioral and Neural Sciences
No Specific Deadline	NSF: Memory and Cognitive Processes Program

### NSF proposals

The National Science Foundation's Directorate for Engineering is accepting proposals for grants for funding in FY 1983 and 1984 for its program for Science and Technology to Aid the Handicapped (STAH). October 15, 1983 is the deadline for FY 1984 proposals.

The STAH program, administered by the NSF Division of Electrical, Computer, and Systems Engineering (ECSE), focuses on basic research efforts from a variety of fields that will expand current knowledge on disabilities of the handicapped and improve the design of devices to help them.

Approximately \$2 million is available for FY 1983 and \$2.3 million for FY 1984 for the STAH program. Proposals should be prepared in accordance with guidelines set forth in *Grants for Scientific and Engineering Research* (NSF 81-79). Discussion of the appropriateness of a research topic is strongly recommended before preparation of a formal proposal.

The Office of Interdisciplinary Research of the Directorate for Engineering is coordinating support for research of interest to STAH. Research topics include, but are not limited to, materials research for improved tactile, ultrasonic and laser sensors; artificial intelligence techniques for synthetic speech and character recognition; basic research in perceptual and cognitive processes involved in mobility and orientation; measured acoustical properties of speech and their relation to intelligibility; and tissue culture networks on microcircuit chips.

For further information, contact the Office of Sponsored Research, or Dr. Larry Scadden, STAH Program Director, National Science Foundation, 357-9618. For information about other NSF research programs in Linguistics, Sensory Physiology, Neurobiology, Plymers, Intelligent Systems and other areas, contact Lynn Preston, Office of Interdisciplinary Research, 357-9707.

As part of their coursework, students in Jayne Lytle's communication class made a movie, but, the film was put into the camera upside down. Here is the creative solution to viewing the film.

## Faculty

*continued from page 1*

admission to and graduation from the baccalaureate and graduate degree programs, requirements for course of study and the standards for academic discipline. The Collegiate Faculty recommends to the president and the Board of Trustees those candidates who have successfully met requirements for degrees. The organization also sets standards for determining faculty status and rules of conduct.

Six standing committees established in the bylaws work on these basic issues and others throughout the year. The Faculty Welfare Committee studies issues such as salary schedules and reviews. The seven elected members of the committee also make recommendations for criteria for promotion, leave of absence and sabbatical leave.

The Undergraduate Curriculum Committee had nine members, two of whom are undergraduate students. This committee works with the director of Admissions and Records on matters of admission requirements and with the registrar on requirements for degrees. The committee also reviews new courses or changes in courses. Their recommendations are brought to the Collegiate Faculty for a vote.

The Committee on Faculty-Student Affairs has 11 members, including three undergraduate and two graduate students. This committee makes recommendations to the full faculty on the orientation program for new faculty and students and develops policies for various activities.

Richard Meisegeier has been chair of the Collegiate Faculty for the past two years.

The April elections were managed by the Committee on Nominations, Academic Discipline and Grievances. These five members also review and decide requests for reinstatement from students given academic dismissal and serve as a hearing committee for a faculty member who has a grievance.

The Committee on Preparatory Programs works with the other committees on issues involving the Preparatory Program.

The Continuing Self-Evaluation Committee is a result of the 1977 accreditation review. The seven elected members are concerned with all academic and professional programs.

Meisegeier says that after these two years of working together, the faculty members who teach graduate students and those who teach undergraduates "are beginning to see that many of our goals are the same." He added, "No college is any stronger or better than its faculty and students. We want to work to upgrade the standards of both."

In September Catherine Ingold, head of the Honors Program, will open the first meeting of the 1983-84 academic year. She was elected to succeed Meisegeier as chair of the Collegiate Faculty. Ingold said that the first task of the faculty will be "to work for the integration of the Northwest faculty into the meetings and committees and other functions of the faculty." Since most faculty members will either teach at the main campus or at the Northwest Campus "it is an obvious challenge and we need to be sensitive to needs of all the faculty members." For example, the Committee on Preparatory Programs is required by the bylaws to have five members, three of whom teach primarily in the Preparatory Program. Meeting time and location will be part of the challenge. The committee is in charge of making any suggestions and revisions in the course of study prescribed for the preparatory students and will be very active this coming year.

In addition to Ingold, other officers of the faculty were elected at the April meeting. They are Horace Reynolds, professor of psychology, elected to his second term as vice chair and Robert Bailey, instructor of Business Administration, who will succeed Victoria Brown, instructor of drama, as Secretary. Susan Anthony, professor of Psychology, had served as secretary until her year of sabbatical leave. Members of the committees were also elected. During the summer these committees will elect their chairpersons and begin planning for the fall meeting.

# A Message from the President

## The President's Art Council

For the past five years, everyone on Kendall Green has had the opportunity to observe museum-quality art in different settings all over the campus. We discovered that many individuals and corporations who own extremely valuable collections of art are most willing to share them with Gallaudet College. They understand almost immediately how important the visual environment of a deaf person is and they have been willing to permit the selected items from their collections to be enjoyed by everyone on this campus. The epitome of this effort was reached when Mr. Cantor of New York City permitted five Rodin sculptures to be shown here for six months.

The President's Art Council was established to assist with this program. Already it is more successful than we had dreamed it could be. We needed help in acquiring a variety of artistic media, advice on how to display it, and what kind of permanent collection the College should endeavor to have. Again, we were most fortunate to find people who were willing to assist Gallaudet College in any way they could. The members of the Art Council are Ms. Joan Brown (a successful artist in California), Mr. Harry Drake (a hearing impaired collector from Milwaukee), Mrs. Olga Hirshhorn (the widow of Joseph Hirshhorn who has a collection of her own), and Mr. Robert Rowan (a retired industrialist and art collector in the Los Angeles area). Ms. Judy Mannes is the curator of art on campus, and Mr. Robbie Macfarlane has served over the past few years as a consultant to this project.

On May 4 and 5, the Committee met and discussed at length a plan which had been developed for art on Kendall Green. The plan made clear the objectives to be achieved in the acquisition and placement of art on campus, feasible indoor and outdoor sites, types of artistic media to be sought, and other related matters.

The Art Council also reacted to a proposal for another sculpture north-

east of the Kendall Demonstration Elementary School by Nancy Holt. Ms. Holt recommended a sculpture consisting of geometric designs formed by six inch black water pipes which rise at points to 20 feet high. The sculpture ends in carefully designed drains in which water appears and disappears. The Council felt that this was an intriguing design for children and advised the College to accept the proposal. As soon as two or three issues are resolved, this probably will be done so that the sculpture can be constructed this summer.

In the near future, I expect people to be visiting Gallaudet College to see good art and to discover deafness. This should help us to have even more friends than ever.

## The Sports Banquet

Recently I returned from a trip in time to join the Gallaudet College Sports Banquet which was in progress. As I heard of the records of the various teams and watched students receive their awards, I was impressed.

Someone might say, "You mean all of the Gallaudet teams had a winning season?" No, the win/loss record left something to be desired and the impact of a very cold, wet spring was devastating to the baseball, tennis and track teams. I was impressed because of the breadth of participation of the Gallaudet College student body in varsity athletics. For example, the University of Maryland recruits its varsity teams from all over the country and the percentage of University of Maryland students on a varsity team would probably be less than 1%. In other words, University of Maryland students are virtually spectators. The possibility of a typical student being on a varsity team is quite remote. At Gallaudet College, however, we do not recruit athletes and the percentage of the student body actively participating in varsity sports would be at least 15%. This is impressive.

I was also impressed with the sheer spirit and "gutsiness" of our athletes. Our teams compete with colleges and universities with student bodies seven or eight times the size of our own.

All of us owe a vote of thanks to our coaches and the students who participate on varsity teams. They represent Gallaudet College well. As a matter of fact, I imagine that many colleges and universities wish they had athletes with this degree of skill, spirit and determination.

## HUD gets TDDs

As part of the Department of Housing and Urban Development's program to implement Section 504 of the Rehabilitation Act of 1973, the agency is trying to assure access to HUD programs to all deaf and hearing impaired persons.

HUD has purchased 11 TDDs to try to meet this need. One is available at HUD Headquarters, 451 Seventh St. SW in D.C. That TDD number is (202) 755-5857. The office is open from 8:45 a.m. until 5:15 p.m.

TDDs have also been installed in HUD's 10 regional offices around the country.

MSSD students Allison Gomp and William Byrd perform a scene from "Babes in Arms" at the U.S. Capitol on May 10. MSSD has performed at the Capitol for the past five years.

## Graduate begins walk across country

by Mike Kaika

Paul Hughes, a 1982 Gallaudet graduate, has begun an attempt which no other deaf person has accomplished and only a few hearing persons have succeeded in doing—walking across America.

He began his trip, which he estimates will take close to a year and cover 5,000 miles, at the crack of dawn on May 9 from the steps of Chapel Hall on the Gallaudet campus.

Hughes was practically raised in the great outdoors. "My family loves nature, and often we went camping, hiking and exploring," he said.

Hughes was born deaf and grew up in a hearing environment. He attended

public schools which had programs serving deaf students and transferred to the California School for the Deaf at Riverside for his high school education. He received his degree from Gallaudet in physics and now makes his home in Whittier, CA, in Los Angeles County.

Traveling across the country is nothing new to Hughes. In May, 1981 he rode his Univera 15 speed bike from Gallaudet to the California border in 17 days, averaging 130 miles a day. On Aug. 7, 1981, he hopped on his Kawasaki 440 motorcycle at his home in Whittier and arrived at Gallaudet on Aug. 17, one day before registration began for the fall semester. "I could have arrived much sooner," said Hughes, "but I purposely took a longer route. With the touch of this trip, he said, he has touched all 50 states during his travels (he flew to Hawaii and Alaska several years ago) and 10 of 12 provinces in Canada.

Hughes is attempting to walk across the country alone. He began preparing for his walk in December, 1982—purchasing supplies and equipment, studying maps and building a portable two-wheel trailer which he will pick up in Georgia. He will walk along the C&O Canal to Harpers Ferry, W VA and then follow the Appalachian Trail to Marietta, GA, where he will pick up his trailer at a friend's home. From Marietta, with the trailer fastened to his torso, he will follow a southwest route to the Pacific Ocean.

He hopes to average 20 miles per day, walking only during daylight hours until he reaches the desert. "When I approach the desert, I plan to walk at night when it is cooler, and set up camp during the day," he said.

Paul Hughes gets ready to begin his cross country walk from Chapel Hall.

Gallaudet College is an equal opportunity employer. education institution. Programs and services offered by Gallaudet College received substantial financial support from the Department of Education.

## Children of campus people can enroll in summer reaction program here

The deadline for enrolling children in an educational/recreational program for six weeks of fun and learning is fast approaching. The Gallaudet Children's Summer Instructional and Recreation Camp is still accepting applications until June 1.

The program is available for children of faculty, staff and students. It begins June 20 and will continue through July 29.

The program is operated by the Physical Education and Athletics

Department and its students who are majoring in Physical Education or Recreation. The morning program begins at 8:30 and ends at noon. Morning activities include swimming lessons, canoeing, dance, sign language instruction, tennis and some off-campus events. The afternoon program continues until 4:30 p.m. It is less structured, with recreational activities. Parents can sign up for either the morning or afternoon program, or both.

The program is available for children from three to 10 years of age. The three-year-old program, new this year, has already been filled, but there are still openings for the four to 10 year old groups.

A supervised lunch hour will be offered this year so that parents do not have to worry about picking up and dropping off their children during lunch. All children remaining for lunch hour will be required to bring their own brown bag lunch and canned drinks.

The cost of the morning session is \$60 for six weeks (\$10 per week). The afternoon session is \$90 for six weeks (\$15 per week). Additional children will be charged \$35 for the six-week morning session and \$60 for the six-week afternoon session.

Persons interested in giving their children a safe, supervised learning experience should enroll as soon as possible. Contact the Physical Education Department, x5680, for an application.

Sign language teacher Agnes Sutcliffe works in a classroom in the Learning Center.

tion from the questionnaires will be made to determine factors which predict occupational achievement. Crammatte noted that John Schroedel of the Center for Assessment and Demographic Studies, who helped him develop the questionnaire, had found earlier that two important factors in determining the level of work hearing impaired persons attained were the highest academic level they completed and their first job.

The occupations of parents of those answering the questionnaires will also be tabulated. Crammatte recalled that in his first study, he originally included only questions about the father's occupation. "I got a few responses calling me a sexist pig," he smiled. "So I added a question about the mother's occupation. Most who responded said their mothers were housewives." He predicts that this has changed in the 20 years since he did that study.

Although no formal analysis of the data collected on the questionnaires has been made yet, Crammatte has made some observations while processing the questionnaires. More of the respondents work with deaf people than with hearing, he said, and a great many of the respondents are teachers of the deaf. In responding to questions about job likes and dislikes, "most of the teachers didn't like their salaries," Crammatte said. However, when also asked what their dream job would be, many of these same teachers responded, "My dream job is the one I have now." Some respondents had rather unusual dream jobs, Crammatte noted, such as one teacher who aspired to being a "gentleman farmer."

In contrast to his 1960 study, said Crammatte, he now found much

greater variety in jobs, including persons who are lawyers, doctors, actresses and assistant district attorneys.

Of the Gallaudet graduates, he observed that a large number earning high salaries were those who majored in mathematics with emphasis on computers, and business administration majors. A relatively high number of Gallaudet graduates who became teachers received their BAs from Gallaudet in a liberal arts subject and then went on to get master's degrees from Western Maryland College and, to a lesser extent, California State University, Northridge.

Crammatte used a number of sources for names of potential respondents. They included national lists and membership rosters such as the Gallaudet College Alumni Survey, NTID Alumni Feedback Surveys, American Professional Society of the Deaf and many others. In addition, help was sought from state or local commissions for deaf people, state rehabilitation specialists for the deaf, national offices of religious programs and individuals and community leaders knowledgeable about deafness. Help in locating sources also came from the *American Annals of the Deaf*, 1982 directory issue.

The mailing list was maintained by the Computer Center, and Crammatte is being helped with the computerized analysis of data by Susan Jablonski and John Woo of Demographic Studies.

"I've gotten great cooperation from the Research Division, a very cordial reception," said Crammatte of his work with the division during the past year. "Flo and I have enjoyed our stay on campus very much."

The final format of the results of his study is still to be determined. When completed, there will be enough information for a book.
